

NWL Transformers, Inc.

In this issue:

- Product Configurators Online
- DGA for T/R set Fleet Analysis
- kVA Savings with PowerPlus
- PowerPlus on a Biomass Boiler

Online Power Supply Configurators

Configuration sheets are now on our website to simplify specifying and ordering our Precipitator Products. A complete list of these configurator sheets can be found [here](#). Online forms for our [Transformer/Rectifier sets](#) and [PowerPlus](#) are also available.

Assess T/R Health with Oil Analysis

Our [Field Service department](#) has partnered with Weidmann Laboratories to provide oil testing services for your precipitator power supplies. Oil samples are collected, analyzed and reported (a sample report is shown [here](#)). The results establish a baseline of each T/R's condition for comparison with future tests. T/R repairs and service can then be proactively scheduled, rather than waiting for units to fail.

kVA Savings with PowerPlus

Improving precipitator collection efficiency is the reason why hundreds of powerplants now use PowerPlus. However, some of our customers have reported a reduction in energy consumption as well after replacing their T/R sets. At first, this might seem counter-intuitive, since PowerPlus delivers more average power into the precipitator. [This paper](#) explains how some customers have been able to collect more dust while reducing their electricity usage.

Pine Oil Boiler uses PowerPlus

One of our European customers who specializes in air pollution control equipment for small industrial companies informed us that [PowerPlus](#) is not just useful in reducing particle emissions from coal fired utility generating stations. They pointed out that they've used PowerPlus on a number of biomass boilers, including peat and pine oil. We've added a technical note on one such application, which can

NWL is proud to offer you:

- Transformer spare parts support
- [Field service coverage within North America](#)
- Transformer testing services
- [Power supply and rapper control upgrades](#)
- [Installation support and start-up assistance](#)
- [Full range of service, from emergency repair to total refurbishment](#)

be found [here](#).
